SOLUCIONES INTEGRALES
DEL ALUMINIO

Furniture sector

We transform your ideas into aluminium

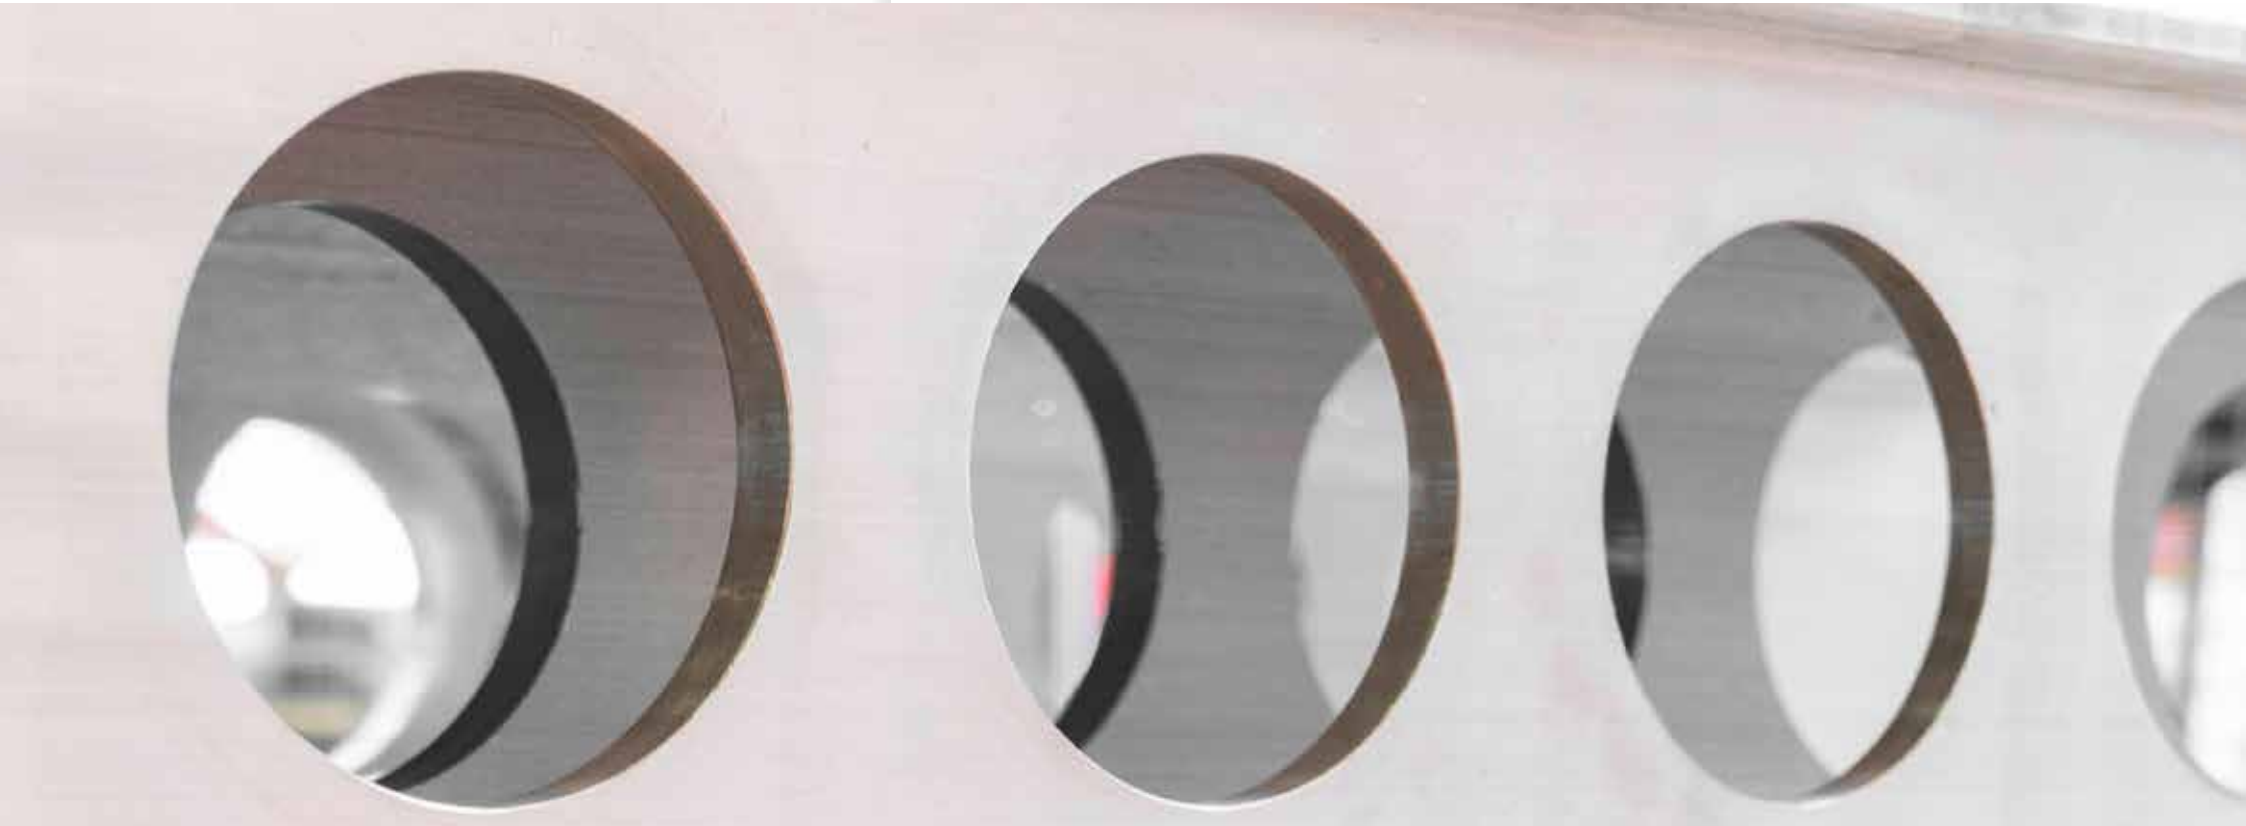

For us, there are no big or small projects. If our clients imagine it, we help them make it happen.

For more than 20 years, Promei has been helping clients in a wide range of industries, from construction, architecture and transport to high-end design products, in the conception, development and production of their ideas. in the conception, development and production of their ideas.

Technology, **expertise**, design and technical support

Dominamos el detallismo técnico, contamos con tecnología de alta precisión y tenemos la experiencia profesional que asegura un acabado perfecto.

Any shape you can imagine has a place in Promei. For both straight and curved parts, we have an experienced welding and polishing department that will make the joints unnoticeable, giving the product unparalleled strength.

In addition, we offer support in design, engineering and assembly, facilitating to the maximum the clipping of the final product, even the final customised packaging, which means cost savings to be taken into account. which means a cost saving to be taken into account.

Machining for the outdoor furniture sector

Urban Furniture

Design, extrusion, finishing and machining of highly complex profiles for street lighting and street furniture such as street lamps and large luminaires furniture such as street lamps and luminaires of large luminaires.

Pergolas

Design, extrusion, finishing and machining of large profiles for aluminium pergolas and aluminium enclosures, as well as aluminium structures for terraces.

Our technical and tooling department will give you support to carry out any profile geometry.

Street Furniture

You can count on us for your outdoor furniture projects. aluminium, aluminium structures for furniture, for terraces, tables, chairs, benches, litter bins...

More than 400 lacquered and anodised finishes.

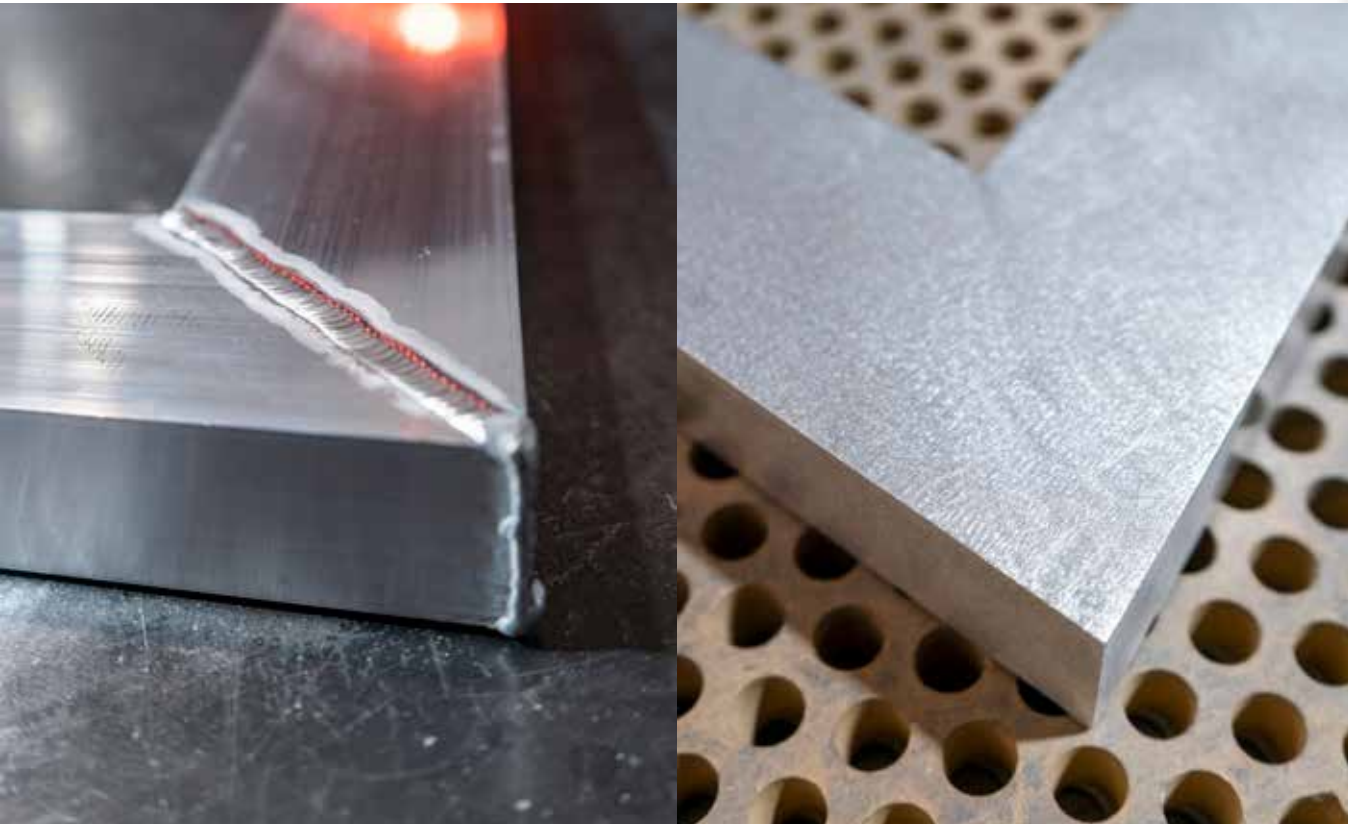

Aluminium welding

Imperceptible joints,
resistant finishes.

The seamless joining of aluminium for designs that require attention to detail.

We have several welding stations, mainly aluminium TIG welding and polishing booths.

This helps us to guarantee an optimal result both functionally and aesthetically functional as well as aesthetic, achieving high quality high quality finish.

Highest **quality**

Capable of welding profiles of **small thicknesses**

It is the most **corrosion resistant**

Most aesthetically pleasing weld seams concealed under **lacquer coating**

Other: bending, cutting, laser and bending

We complete the entire value chain with specific welding and joint polishing services, bending capabilities up to industrial profiles, clipping, injection moulding, bending or laser cutting. Maximum capacity in services and solutions.

Customize packaging and shipping

We provide total solutions in a single location, saving on labour, logistics and shipping costs.

Whatever your project, we can take care of the finishing touches.

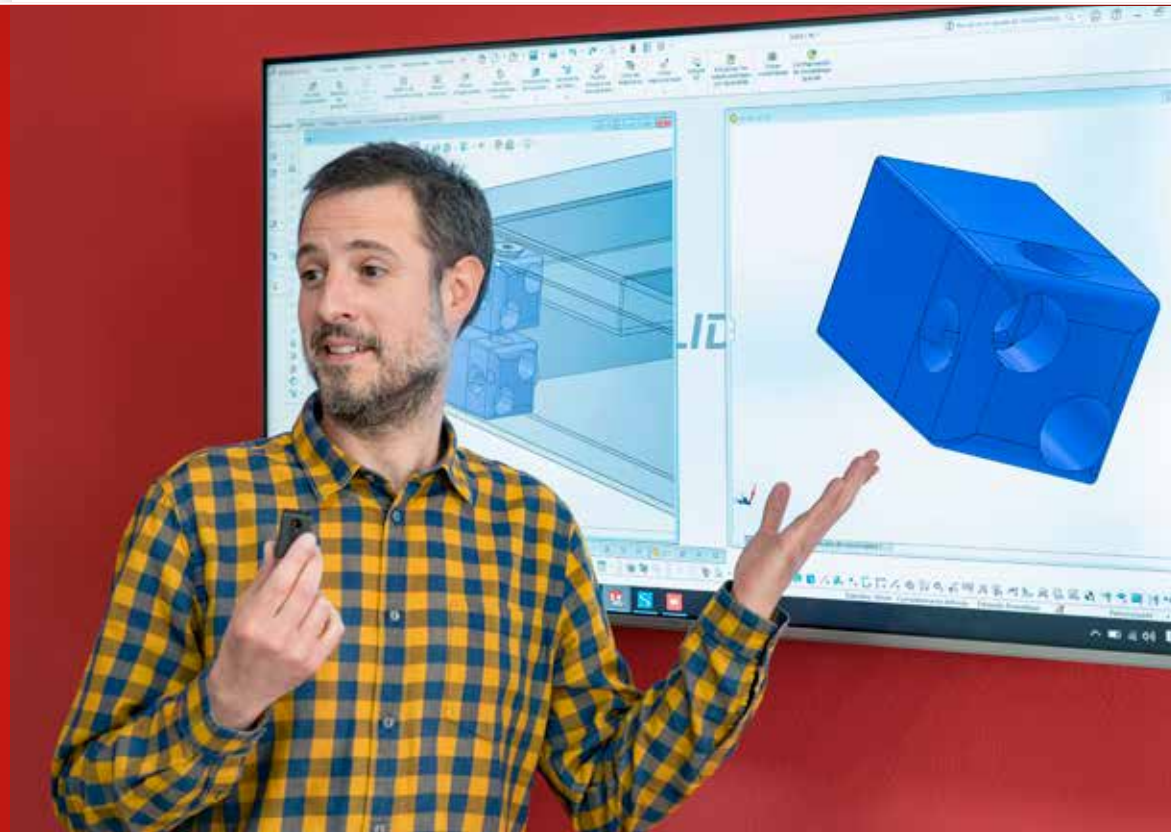

By centralising the packaging with your brand image and preparing it for shipment in our facilities, we also manage to be more sustainable by reducing the product's carbon footprint.

Ayudamos a **desarrollar** el producto

We work with our customers to create the ideas into the final product.

At Promei we have extensive experience in the machining and assembly of products related to aluminium profiles, so we have the capacity to adapt the needs and demands of the client to the final product.

We advise and develop joint systems or assembly components with the aim of creating competitive advantages for both design and technical or functional sectors.

FEASIBILITY STUDY

DEVELOPMENT OF THE PART

DETAILED ENGINEERING (3D DESIGNS, PROTOTYPES...)

MANUFACTURE

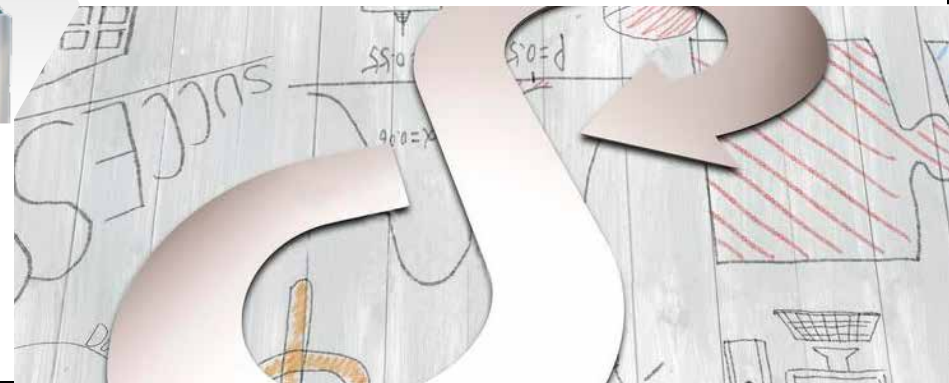

Infinately **recyclable** aluminium

In addition to the total recyclability of aluminium, we also take care of its production factors, such as the exhaustive treatment of waste water, recovering up to 50%.

Aluminium is the sustainable material of the present and the future, a key player in European policies for a climate-neutral continent by the year 2050. It is 100% recyclable and infinitely recyclable.
If it's aluminium, it's better for everyone.

We have developed an environmentally responsible policy, which extends to all areas of the company, with periodic inspections of emissions, soil, noise and spillage controls.

More than 20 years of experience

Our long experience in the manufacture of aluminium profiles and parts has positioned us in the market as a benchmark company in aluminium machining.

Design and engineering

Our commitment to constant innovation and the use of the most advanced technology in Europe is the basis for being able to meet the challenges that our customers present to us.

Machining centres

Disponemos de centros de mecanizados de 3, 4 y 5 ejes con tecnología CAD/ CAM, sonda de palpado de alta precisión y cambios de herramienta de 0,6 sg.

Integral process

At Promei we can help you shape your idea from start to finish. We work synergistically with the R&D departments of our clients, offering advice throughout the process, and being able to shape the project until the end.

Latest technology

We have the most advanced machinery in the aluminium sector. This constant investment in technology allows us to continue offering integral solutions with high added value.

Piece anodised

Our comprehensive service, which includes everything from extrusion to machining, enables us to carry out post-cutting anodising after cutting and die-cutting so that the aluminium profile has maximum protection.

This translates into a higher quality quality and useful life of the product.
